# Problem Set 2

## Rodney Farrow

## January 2019

# 1 Part I

## 1.1 Important tools for data economists

Web Scrapers:

Using an API to gather data or HTML to parse data for collection purposes

Programming Languages:

Programs used for statistical analysis

Large Data Set Handlers:

When data sets are too large for personal computers, we use RDD's and SQL to open and manage data

Data Visualization:

A tool used in programming languages to help with understanding data
